## Methodology Used in SI Reference

In terms of methodology, SI Reference employs a comprehensive approach to gather data and evaluate the information. The authors use qualitative techniques, relying on experiments to collect data from a sample population. The methodology section is designed to provide transparency regarding the research process, ensuring that readers can replicate the steps taken to gather and interpret the data. This approach ensures that the results of the research are valid and based on a sound scientific method. The paper also discusses the strengths and limitations of the methodology, offering evaluations on the effectiveness of the chosen approach in addressing the research questions. In addition, the methodology is framed to ensure that any future research in this area can expand the current work.
